Professional Summary

Full-stack developer with a frontend focus and 6+ years of software development experience. Builds web and mobile products with Angular, React, Next.js and Ionic, complemented by Java and Spring Boot backend work at Efigen and Epsilon Software Solutions. Experienced in REST APIs, Docker and AI-assisted development using TDD, SDD and API contracts.

Technical Skills

Full-Stack Core: Java · Spring Boot · REST APIs; TypeScript · JavaScript; Angular 17+ · React · Next.js; Ionic · React Native; Node.js · NestJS · Express; Python / FastAPI

Architecture and Quality: DDD · Hexagonal Architecture; TDD · SDD · OpenSpec; OpenAPI · BFF architecture

Development Tools: Docker · Git; Claude Code · Codex; OpenCode · Pi; AI-assisted workflows

Professional Experience

Vanguard Vision AI

Full-Stack Development | Frontend, Mobile & AI | Jul 2025 – Jul 2026

- Developed scalable web and hybrid mobile applications with Angular 17+, Ionic and TypeScript, focused on performance and maintainability.
- Developed and integrated REST APIs using TypeScript and used Docker in development workflows.
- Applied TDD and SDD practices with OpenSpec API contracts; used Claude Code, Codex, OpenCode and Pi for scaffolding, test generation and refactoring.

Mercado Libre

Frontend Engineer | May 2024 – May 2025

- Developed high-traffic e-commerce interfaces and optimized Core Web Vitals to improve frontend performance.
- Contributed to the Mercado Play team, building streaming and video experiences in a continuous-deployment environment.

Efigen Renewable Energy

Web Developer & UX/UI | Full-Stack Development | Jul 2022 – Oct 2023

- Developed Java and Spring Boot backend functionality and REST APIs as part of full-stack web solutions.
- Worked with databases and Docker alongside reusable frontend components, connecting business requirements with technical delivery.

Xcala

Frontend Developer & UX/UI | Jan 2021 – Jul 2023

- Designed and developed transactional and onboarding flows for Fintech and alternative market products, bridging visual design (Figma) with secure React.js implementations.
- Balanced banking security with frictionless user interfaces, applying Atomic Design principles within Agile Scrum teams.

SirBuho

Web Developer | 2020 – 2021

- Developed and maintained PHP and WordPress websites, including custom plugins and bespoke pages.

Epsilon Software Solutions

Full-Stack Developer | 2018 – 2020

- Developed full-stack web solutions with Java and Spring Boot, including REST APIs and frontend integrations.
- Worked with databases and Docker as part of backend development and application delivery.

Education

Bachelor of Graphic Design | UNICA | 2002–2008

Computer Engineering studies | URBE | 6 semesters, not completed

Certifications

Essential TypeScript (OOP) | Udemy | Aug 2026

TypeScript: Complete Guide | Udemy | Dec 2023

Modern JavaScript | Udemy | Oct 2023
